

# Extend Your Privacy Program Beyond Incidents

DSARS, PIAS, AND THIRD-PARTY RISK MANAGED IN ONE PLATFORM

## Modern Privacy Requires More Than Incident Response

Privacy programs today must manage ongoing regulatory workflows, from data subject requests to risk assessments and vendor oversight, while maintaining speed, consistency, and defensibility.

RadarFirst extends beyond incident management to help privacy teams operationalize:

- Data Subject Access Requests (DSARs)
- Privacy Impact Assessments (PIAs/DPIAs)
- Third-Party Risk Assessments (TPRAs)

All within a unified platform built for regulatory decision-making.

### CORE PRIVACY WORKFLOWS, OPERATIONALIZED

#### Data Subject Access Requests (DSARs)

##### What is it?

A legal requirement under regulations like GDPR and CCPA, allowing individuals to access, correct, or delete their personal data.

##### Why it matters

- Strict response timelines (GDPR: 30 days, CCPA: 45 days)
- Requires coordination across systems and teams
- High volume + high risk if mishandled

##### How RadarFirst Helps

- Public-facing request intake forms
- Configurable workflows and templates
- Centralized dashboard for tracking and status
- Deadline management with audit-ready records

##### Quick Impact

- Meet regulatory timelines with confidence
- Streamline high-volume request handling
- Maintain a complete, defensible audit trail

#### Privacy Impact Assessments (PIA / DPIA)

##### What is it?

A legal requirement under regulations like GDPR and CCPA, allowing individuals to access, correct, or delete their personal data.

##### Why it matters

- Required for high-risk processing under GDPR
- May require regulatory consultation in Europe if risks cannot be mitigated
- Critical for AI governance and defensibility
- Often inconsistent and difficult to operationalize

##### How RadarFirst Helps

- Simple intake for cross-functional teams
- Configurable, standardized assessment templates
- Centralized tracking and documentation
- Consistent, repeatable workflows

##### Quick Impact

- Identify and mitigate risk earlier
- Standardize assessments across the organization
- Ensure complete, audit-ready documentation

#### Third-Party Risk Assessments (TPRAs)

##### What is it?

A process to evaluate vendors and partners who process or access your data.

##### Why it matters

- Third parties are a leading source of privacy risk
- Organizations retain accountability for shared data
- Vendor oversight is required not optional

##### How RadarFirst Helps

- Vendor intake and assessment workflows
- Flexible templates aligned to your risk criteria
- Risk scoring and approval processes
- Ongoing monitoring and review tracking

##### Quick Impact

- Reduce vendor-related exposure
- Standardize evaluation and approvals
- Maintain visibility across your vendor ecosystem

# One Platform. Multiple Workflows.

THE SMARTER CHOICE FOR REGULATORY CONFIDENCE

CATEGORY	ONETRUST	RADARFIRST
RANGE OF SOLUTIONS	Designed to check the boxes of a privacy program.	Purpose-built software that codifies laws into actionable insights.
PLATFORM CAPABILITIES	Buy all modules for a complete program,	Purpose-built products that work together seamlessly or deliver value on their own.
REAL-TIME LAW UPDATES	Updating to a new law version can wipe out data, leading to lagging adoption of new requirements.	We keep laws updated in real time, so you do not have to.
VISIBILITY & INSIGHTS	Siloed data, making it difficult to draw complete conclusions	Flexible data outputs that spotlight high-impact issues like overdue notifications, high-risk AI systems, and internal escalations.
REGULATORY RIGOR	Focused on workflows, often in a build-your-own manner, which may not be based on true regulatory requirements.	Flexible reporting that highlights overdue notifications, high-risk AI systems, and critical escalations.
IMPLEMENTATION & SYSTEM ADMINISTRATION	Usually requires consultants to build and manage the system, leading to additional costs and longer wait times to make changes.	In-house solution consultants guide setup and training, so your team can manage Radar with ease. No certification or advanced experience required.
LONG-TERM SUPPORT	Pay for dedicated support.	Dedicated support is included in all support tiers.

From requests → assessments → vendor risk → incident response, RadarFirst provides a unified approach to managing privacy obligations.

## WHAT THIS MEANS FOR YOUR TEAM

Manage core regulatory workflows in one place

Maintain consistent, defensible documentation

Reduce operational complexity across teams

Extend privacy beyond reactive incident response
