

# Is your privacy compliance keeping up with finance industry benchmarks?

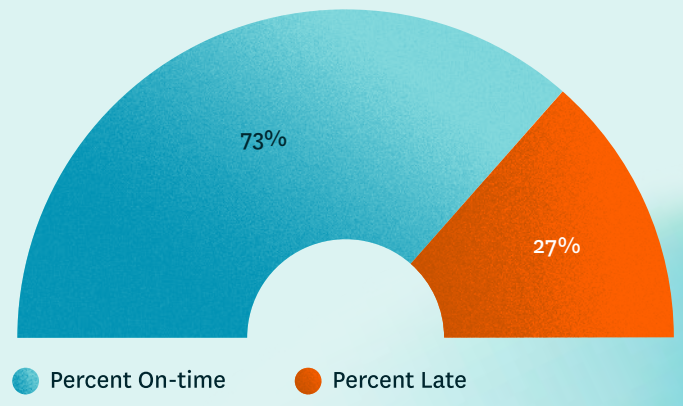

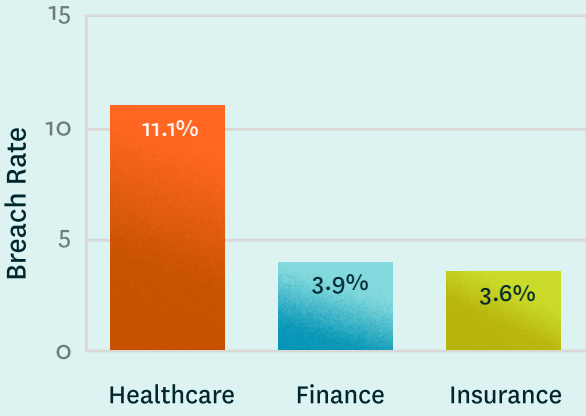

Grab a pen and fill in the blanks to see how your privacy compliance measures up

## Finance organizations have fewer notifiable breaches, but more complexity.

When Finance incidents happen, they often cross multiple jurisdictions, making them more complex to respond to and slower to resolve.

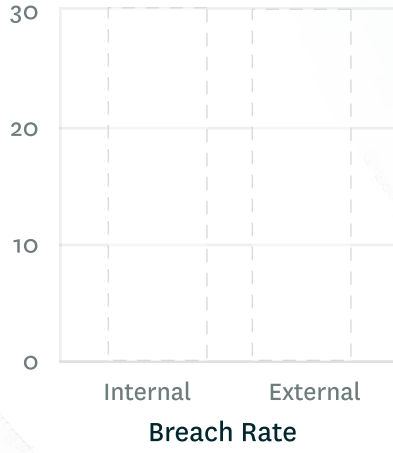

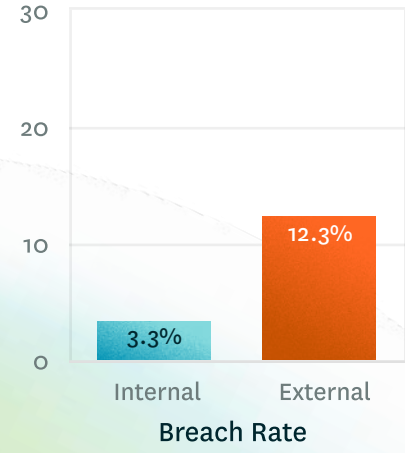

**27%**

Over a quarter of notifications — a full 27% — are sent late.

## Third-party vendors are the weakest link

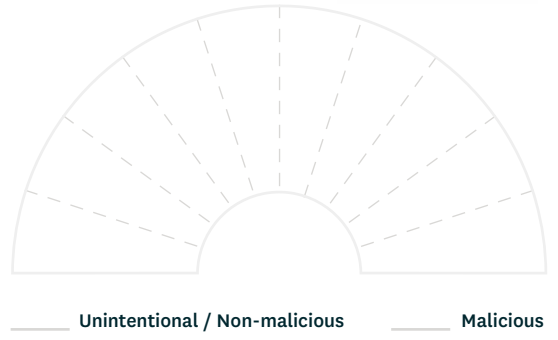

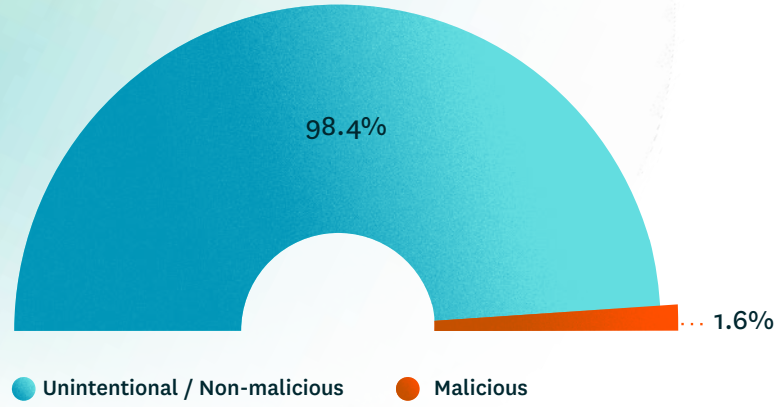

**2x** Incidents from external partners are nearly 4X riskier than internal incidents.

*Fill-in-the-chart: What percent of your notifiable breaches originate internally? What percent externally?*

## Human error far outweighs hackers

Mistakes, not hackers, are your biggest risk. How is your privacy training equipped?

*Fill-in-the-chart: What percent of your incidents are malicious?*

## Complex regulations add to breach notification challenges

Financial breaches often trigger multiple regulatory obligations.

**>2X**

Finance incidents impact more than 2x as many jurisdictions as Healthcare incidents.

*Fill-in-the-chart: How many jurisdictions does your average incident involve?*

Average Number of Jurisdictions Impacted

## How does your program compare?

Compare your privacy incident response metrics against those of leading healthcare organizations. In our full **2025 Privacy Incident Management Benchmarking Report**, you'll get access to extensive privacy management data from leading healthcare organizations with **expert analysis and insights**, featuring incident response breakdowns and **actionable recommendations** and strategies to close performance gaps, streamline your workflows, and reduce overall risk.
